

NEW PADS FOR COMBIFLEX BRAKES

► **The brake pad choice is extremely important** to the brake good working and to obtain the expected performances. Temperature, torque and speed are variables which put through pads to a vary high stress which was reproduced by our technicians during the performance tests.

► **We have not neglected enviromental problems.** Our pads produce very low powder, we reached a 70% under standard powder production, keeping brake performances as high as standard. Get in touch with our technical-sales office to get more informations about what best we can offer you regarding pads and pneumatic brakes, including our new HP pack which helps to **quadruples pads life**.
